Fixed Issues in DataShop v3.4.7 as of June 24, 2009

Issue ID	Priority	Summary
DS703	High	Big graph image doesn't update on LC page when KC model changes
DS741	High	Unowned models on KC Model page have 'click to rename' tooltip
DS804	High	LC - secondary model predicted line has shapes at points when it is not supposed to.
DS818	Low	Error Report example in documentation is very out of date
DS819	High	LCPI: next/prev opp buttons don't work if graph has dropped observations
DS831	High	Attempt at step numbers are wrong in dataset on production
DS855	High	Cached export file not updated if KC model is deleted or renamed
DS866	High	CFG: Something funky happening to custom fields
DS870	High	Sample aggregation progress dialog shows greater than 100% done
DS893	High	Aggregator: progress bar disappears but sample is not ready.
