# Fixed Issues in DataShop v4.3.6 as of September 9, 2010

| Issue ID | Priority | Summary |
|---|---|---|
| DS1167 | Urgent | CFG: fails randomly on QA as of v4.2.0 release |
| DS1196 | Urgent | Metrics: total student hours is way off |
| DS1117 | High | Agg: do not run lfa backfill sp unless lfa has been run |
| DS1148 | High | Agg: ran but was incomplete for Rolf Schwonke |
| DS1164 | High | WebServices: get dataset requests fail with "Unknown error" |
| DS1166 | High | Add 'domain' to api/pslc_datashop_message.xsd |
| DS1168 | High | Problem Breakdown export row numbering is wrong |
| DS1170 | High | Allow anonymization against a list of users provided in a file |
| DS840 | High | KC Model column missing from transaction export preview if one sample has no KCs |
| DS1052 | Medium | Transaction Export: rows not sorted correctly for a new sample |
| DS1062 | Medium | Remove "non-SP" code path from transactions cached export |
| DS1071 | Medium | WebServices: no error returned if value for 'cfs' parameter not valid for get transaction request |
| DS1134 | Medium | Transaction export, All Data selected, export message tells me to select All Data for a speedy export |
| DS1169 | Medium | Selecting from the dataset selection pop-up redirects to homepage not the dataset info page |
| DS553 | Medium | Undo/redo not aligned correctly in Overview table. |
| DS673 | Medium | 'Predicted Error Rate' points sometimes not connected in Performance Profiler |
| DS736 | Medium | Error aggregating modified sample |
| DS822 | Medium | FF 2 & 3: Tooltip doesn't display for Predicted Error Rate point on LC |
| DS823 | Medium | Tooltip displays over wrong graph in Performance Profiler |
| DS827 | Medium | Steps with no KCs display when option disabled on Student-Problem page |
| DS833 | Medium | Better display for custom-field rows in the transaction table |
| DS846 | Medium | KCM export does not include 'KC Model (Default)' column header |
| DS849 | Medium | Error on exporting two KC models |
| DS883 | Medium | Sort order of Step Rollup table is not correct |
| DS938 | Medium | LCPID window does not remember its open/close state |
| DS989 | Medium | KCM export does not include KC Model column header |
