

## Fixed Issues in DataShop v5.2.5 as of January 13, 2012

Issue ID	Priority	Summary
DS1351	High	Changed LFA to AFM during the KC Model Import
DS1352	Urgent	Agg: using non-start events to determine the problem view/start time in tx export
DS1353	High	KCM: show this subtab under the learning curves tab too
DS1354	Low	Allow for inputs longer than 255 characters for AttemptInputs in the TutorMessageConverter.
DS1363	High	Web browsers use cached versions of CSS and JS files instead of getting the latest when we release DataShop
DS1349	High	FFI: File not imported if custom field value exceeds the max length allowed
