Fixed Issues in DataShop v3.5.7 as of August 24, 2009

Issue ID	Priority	Summary
DS677	High	LC subtab switches to LFA when selecting/deselecting samples
DS697	Medium	Error when saving "Additional Notes" field
DS698	Medium	CFG - if no dataset level title, exception occurs and levels are missing
DS706	Medium	No tx export preview table displayed after creating a new sample
DS715	Medium	Sample name doesn't refresh on report after creating/deleting sample
DS721	Medium	Export functionality broken after a By Student-Step export
DS727	High	Transaction export table missing a column for imported dataset
DS728	High	Assistance Time number of dropped opportunities not shown
DS745	High	Old cached export file is exported
DS751	High	Old export cache file not deleted if sample is renamed
DS790	Medium	KCM Export file contains wrong number of columns for KCM
DS796	Medium	No LC point should be selected if current point is not displayed
DS813	Medium	Sample name not displayed in content header after unselected sample modified or new sample created
DS814	Medium	'Secondary Predicted' line on Performance Profiler graph
DS826	High	Error occurs when saving sample with long filter
DS829	High	KC set doesn't appear as loaded after switching model
DS832	Medium	Inconsistent display of millisecond latencies in KC model export ("Avg. Assistance Time" and "Avg. Correct Step Time")
DS862	Medium	Pagegrid 'Loading Data' popup displays outside the user's view
DS886	High	Import Tool runs out of memory when processing large import files.
DS897	Medium	KCM "number of observations labeled with KCs" should not be "0" if there are observations labeled with KCs in the model
DS917	High	Problem Name listed in Sample Selector doesn't exist
DS919	High	CFG: run marked as successfully completed even if invalid path for tx export SP
DS925	High	Include host name in email messages from Extractors.
DS926	High	'No results' on last Problem Breakdown page grid
DS927	High	Error Report shows an attempt at a step that should be excluded
DS935	High	Agg: Error or Exception during sample creation leaves temp tables behind
DS936	High	More rows in Problem Breakdown export than rows in preview
DS940	High	Transaction Export: failure in UI if log conversion process already started caching sample
DS941	High	Sample name in cached file out of sync with sample name.
